BenQ Intros Wide-screen LCD Monitors

Digital network devices provider BenQ has launched its latest range of LCD monitors in wide-screen format. The latest range showcases three new LCD monitor models: the 15" T52WA, the 19" T92WA, and the 24" G2400W. The new LCD monitors offer a high contrast ratio and aim to provide an extensive range of LCD monitors in wide-screen format to users.

New Wireless Router from ASUS

ASUS Technology has released the new WL-520gU Wireless router in order to enable users to setup and configure wireless networks easily and without hassle. The built-in Windows Vista Wireless support with a user-friendly and secure

setup adds to the WL-520gUs appeal and provides fast, and efficient wireless LAN setups.

SAS Anti-Money Laundering Upgraded

A provider of business intelligence software, SAS announced a new release of SAS Anti-Money Laundering. SAS Anti-money Laundering now enables classification and management of risk throughout the customer lifecycle. Through a point-and-click interface, users can create unique risk classifications and risk lists, and integrate them into the ongoing transaction monitoring process.

McAfee Intros New Network Security Suite

McAfee has announced McAfee Total Protection for Network, a new suite designed to end the "appliance and product fatigue" associated with deploying, maintaining, and managing multiple security solutions. McAfee has released Total Protection for Network to help organizations consolidate all their network security needs in one comprehensive suite to conduct business more quickly and efficiently.

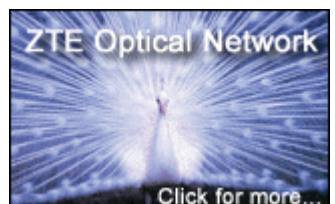

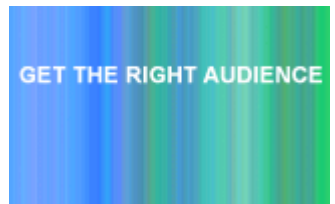

Geometrics New Visualization Software

Geometric has launched its new product, 3DPaintBrush, a visualization software that helps create near photo realistic images, animations, and videos from existing computer-based 3D models within minutes. The 3DPaintBrush is suitable for design professionals who need to create images and animations instantly. The easy-to-use features make it attractive for 3D enthusiasts too.

Corel Launches First PDF Office Suite

Corel has released Corel WordPerfect Office X4. Available for download, WordPerfect Office X4, the first PDF office suite combines all the features that WordPerfect Office is known for.

It offers a full range of PDF capabilities and makes it easy for users to import, edit and export PDF documents, including scanned PDFs, simplifying user workflows and reducing the need for third-

party PDF software.

ActivIdentity Rolls out 4TRESS Kerberos Agent

ActivIdentity, a company that provides digital identity assurance, has released 4TRESS Kerberos Agent for Microsoft IIS, which works in conjunction with the ActivIdentity 4TRESS AA server. The release also extends the ActivIdentity support for the Microsoft product suite. 4TRESS Kerberos Agent eliminates the need for a user to enter his/her Windows password, in addition to a one-time password during the authentication process.

Transcends T.sonic 615

Transcend Information has announced the availability of a new addition to its successful line of T.sonic MP3 players, the T.sonic 615 in India. Based on the popular design of Transcend's best-selling T.sonic 610, the new T.sonic 615 boasts familiar good looks and an extremely lightweight compact design. The T.sonic 615 has a lustrous pearl-white casing and a brilliant dual-color OLED display that is easy to read from any angle, even in broad daylight.

Emagine Releases CLMS

Australia-owned campaign management specialist Emagine International has released v7.0 of its closed-loop marketing system (CLMS), which allows for real-time processing of events, rewards and communications, unique to Emagine. The real time marketing function creates a streamlined, targeted and instantaneous interaction between telecommunications providers and their customers.

FLEXCUBE 2.2 Launched

i-flex Solutions has announced the availability of version 2.2 of FLEXCUBE core banking for IBM System z on z/OS with IBM WebSphere and IBM DB2 software stack. The new version combines FLEXCUBE and IBM System z to enable global financial institutions to respond swiftly to the changing market dynamics. SOA enabled FLEXCUBE fits seamlessly into IBM System z deployments using IBM software.

OpenSocial App on Orkut

Social networking website Orkut has introduced OpenSocial applications for the Orkut online community. These applications, created by third party developers, allow users to customize Orkut profile by adding games, music and much more.

With the launch of applications, Orkut users will have access to more new features everyday, thereby improving the user experience at a faster rate. These applications will speed up innovation, unleash developers' creativity, said Vinay Goel, head of Products, Google India.

Hitachi Launches Ultrastar 15K450 Drive

Hitachi has launched the Ultrastar 15K450 drive, which uses perpendicular magnetic recording (PMR) technology to deliver 450 Gb of storage.

450 Gb Ultrastar drive delivers 30% more I/Os than its predecessor. Currently, the highest available capacity in 15,000 RPM enterprise-class hard drives is an ideal solution for mission-critical server and storage applications, such as online transaction processing, intensive database queries and other multi-user applications. The drive features average seeks times as low as 3.3 milliseconds and the fast rotational speeds reduce average latency time to 2 milliseconds, enabling customers to access data more quickly.

New 45NM Core 2 Duo Processor from Intel

Intel has announced the 45 nm Intel Core 2 Duo Processor E8400 with seven-year lifecycle support for embedded applications. Based on Intel's revolutionary high-k metal gate transistor formula and manufactured on the company's 45 nm process, the E8400 processor offers increased performance by doubling transistor density and increasing cache size up to 6 Mb, which is a three-fold enhancement over the previous-generation Intel Core2 Duo E6400.

Math Algorithms to Manage Disasters by IBM

IBM has announced that its scientists have created specialized math algorithms to help model and manage disasters like wildfires, floods and diseases. IBM's 'stochastic optimization model' was developed by IBM math scientists from IBM Research Labs in New York and India, working with business experts from IBM's Global Business Services. IBM developed a large-scale strategic budgeting framework for managing natural disaster events, with a focus on better preparedness for future uncertain disaster scenarios.

Sun, Fujitsu Expand SPARC Enterprise Server Line

Sun Microsystems and Fujitsu expanded the Sun and Fujitsu SPARC Enterprise server line with the introduction of two new systems based on the UltraSPARC T2 Plus processor. The third-generation CMT SPARC Enterprise T5140 and T5240 servers deliver breakthrough performance and scalability and help enable customers to consolidate the data center into an ultra-dense, energy efficient compute environment, optimized and managed by the Solaris 10 Operating System.
